

51

May 3, 1933

Survey of N. $\frac{1}{2}$ of
lots 1-2-3-4-5+6,
for Mrs. Fanny Gray.
Measured south on
Westline of Maxwell St. to
S. E. cor. of Block 8, 966'
according to original plat
of Geneva Village this
should measure 530' + 80'
plus 360' or ~~970~~ 970'
960' makes N. line of
Wis. St. walk 10 ft. too far
north
Wisconsin St. as occupied
by walks measures 69'
which is 11 ft. short therefore
the south line of Wis. St.
at this is 21 ft. too far north,
but nearly all streets are
built up this. The blocks
measure full width
but the streets are
narrowed as they go west,
Dodge Street is about 69'
Block 8 measures app.
531 $\frac{1}{2}$ feet from N. line
to walk on N. side Dodge St.

N $\frac{1}{2}$ of Blk 8

op-48

52

Block 8 by Thos McKaig
2nd survey measure app 515
and should measure 530.
Alley in Block 8 is abandoned
and should be divided
equally between the two ~~to~~
halves of this block making
each half 988', then if
the lots are divided
in half each half would
have 94 feet, but by
measure of the half block
on east side of Maxwell
Street, N. half measures 98 ft,
and that is what we
gave Mrs. Fanny Gray,
and both she and Mrs.
Howard Grier owner of
South half appeared
satisfied
By Mrs. Gray's request
the S. N. half of lots 1, 2, 3, 4, 5 & 6
were staked with iron pipe
at all corners, Mrs. Gray's W. $\frac{1}{2}$
lot is 56.5' feet E. W. on N. line
and 56.4' on South line
S. line should be longer but fence holds
