Mr. Wm Hink,
City,

Dear Sir; we have measured the lines of your property and find as follows;

The south line is 222 ft. with 60 ft. off the east end leaving 162 ft. between iron stakes.

The north line entire is 221.8 ft. from Willow St. walk to Shoudy's fence. We found no iron stake at the west end but assume that it is the same as the other stakes 1 ft. in from the walk, this would leave the line 220.8 feet in the clear and if 60 ft. was measured off at the east end it would leave your North line 160.8 ft. (no iron stake was found here). Your line on Campbell street is 40 ft. but the entire line is 219.5 ft.

It appears that the Shoudy line is neither straight nor parallel to the East line of Willow St. hence the discrepancies.
