<b>Certification and Permission</b>					
I certify that I am the owner or the authorized representative of the owner of the property that is the subject of this Permit Application. I certify that the information contained in this form and the attachments is true, accurate and complete. I agree to comply with all applicable codes, statutes and ordinances and with the conditions of this permit. I understand that the issuance of this permit creates no legal liability expressed or implied on Walworth County. If one or more acre of soil will be disturbed, I understand that this project is subject to Walworth County Storm Water Management Standards, contained in Article I, Chapter 26 of the Walworth County Code of Ordinances and NR 151 of the State Administrative Code. I understand that failure to comply with any or all of the provisions of the permit may result in permit revocation, an order to stop-work, fines, forfeitures and additional compliance inspection fees. I grant Walworth County permission to enter the premises to collect information necessary to review the plan submitted and to inspect compliance with the conditions of the permit approved.					
<input type="checkbox"/> I am or will be an owner-occupant of this dwelling for which I am applying for an erosion control or construction permit without a Dwelling Contractor Certification and have read the cautionary statement regarding contractor responsibility (attached).

## Cautionary Statement To Owners Obtaining Building Permits

101.65(lr) of the Wisconsin Statutes requires municipalities that enforce the Uniform Dwelling Code to provide an owner who applies for a building permit with a statement advising the owner that:

If the owner hires a contractor to perform work under the building permit and the contractor is not bonded or insured as required under s. 101.654 (2) (a), the following consequences might occur:

(a) The owner may be held liable for any bodily injury to or death of others or for any damage to the property of others that arises out of the work performed under the building permit or that is caused by any negligence by the contractor that occurs in connection with the work performed under the building permit.

(b) The owner may not be able to collect from the contractor damages for any loss sustained by the owner because of a violation by the contractor of the one- and two- family dwelling code or an ordinance enacted under sub. (1) (a), because of any bodily injury to or death of others or damage to the property of others that arises out of the work performed under the building permit or because of any bodily injury to or death of others or damage to the property of others that is caused by any negligence by the contractor that occurs in connection with the work performed under the building permit.

## Additional Responsibilities for Owners of Projects Disturbing More One or More Acre of Soil

I understand that this project is subject to ch. NR 151 regarding additional erosion control and stormwater management and will comply with those standards.

Walworth County  
Residential Building Construction Erosion Control Permit

Justin Lee  
Permit Applicant

147681  
Permit #

Conditions of Permit Approval

1. Tracking of material and soil from the project site onto adjacent roadways will be prevented. A stabilized pad of stone aggregate, consisting of 2" to 6" clear or washed stone, placed 12" thick, the full width of the egress point and 50' long will be installed and maintained, at the location shown on the site plan submitted, (Comm 21.125 (C)).

2. Any sediment tracked onto a public or private roadway from the project site must be removed by the end of the workday. Off-site sediment deposition occurring as a result of a storm event shall be cleaned up no later than one day following the event, (Comm 21.125(1)(d)).

3. The area of land disturbance shall be limited to that area that has been shown on the site plan submitted.

4. All land disturbed, including stockpiled soil and material will be contained. A Sill Fence will be placed where surface water flows off the site, (Comm 21.125(1)(a) at the location:

- Shown on the site plan submitted       Shown on site plan revised by Land Conservation Department

Sill fences must be installed and maintained according to the standards and specifications contained in WDNR Conservation Practice Standard 1056 for Sill Fence. The Sill fencing will be inspected after each rainfall event and at least each week and cleaned, repaired, reset or replaced, if necessary. Sill fencing will be dismantled and removed at the project site is stabilized with vegetation.

5. Stockpiled soil must be contained and must not be placed within 25' of any public / private roadway or drainage-way. Avoid placing any stockpiled soil or material on the property line. Any soil transported off the project site may require additional approvals.

6. All building waste material will be properly managed and disposed of to prevent pollutants and debris from being carried off site. (Comm 21.125 (f)).

7. Site de-watering is not approved for this project site.

8. Land disturbance, filling, excavating, grading, tree or shrub removal is NOT approved within 75 feet of any lake, creek, or other waterbody, (or the approved shoreyard set-back distance) if present on or adjacent to the project site

9. This permit is not valid until the applicant has obtained all required federal, state, county and town permits, if necessary.

10. Other \_\_\_\_\_  
Project Site Restoration, Seeding, Mulching and Landscaping.

11. All disturbed areas will be seeded and mulched by: 7-1-10. Any failed seeding will be re-planted and mulched by: 9-15-10.  
Seeding and mulching application rates and procedures will be conducted according to the WDNR conservation practice standards of the USDA, NRCS Technical Guide, Section IV.
