

Surveyed by the first parties
for the purpose of delivering fuel
located South of the conveyed premises or the
ashes and rubbish out of the basement, and not otherwise.

The following written on a letter from
the Mill Haven Loan Ass'n, to A. Proctor, 1500
Lake Geneva Wis., 10/14/28

The above has been submitted to the writer, who surveyed the land in
question. I have carefully reviewed the description and pronounce it
CORRECT according to U.S. Gov't lines.
The N.O.N. in the description is as stated at the intersection of the
E. 1/8 line and the South line of Sect. 11, T. 1 N.R. 17 E. Town of LINN
WIS. The East and the West lines are further definitely marked by
iron stakes set at the distances indicated. Everything is so
definitely marked that a school boy could follow it.
I know of no more correct description. A. J. Shultz, Wis. Regd. P.M.
